CLASS	SYMBOL	CUSIP	INCEPTION	EXPENSE RATIO	
Retail	FLDGX	58510R879	2/29/2000	Net: 1.05%	Gross: 1.63%
Adviser	DYGAX	58510R770	10/31/2016	Net: 0.81%	Gross: 1.43%
Institutional	DYGIX	58510R762	10/31/2016	Net: 0.80%	Gross: 1.28%

Objective

The Fund seeks to provide long-term capital appreciation.

Investment Strategy

The Fund pursues its objective by investing in areas of the stock market believed to be demonstrating relative strength and relative value. The Fund will normally invest in large capitalization securities, but may invest in smaller market capitalizations when they are believed to demonstrate relative value. Additionally, the Fund can invest in specific industry sectors as well as international equities in order to pursue its objective.

Morningstar Ratings

Overall	3 Years	5 Years	10 Years
★★	★★	★★	★
out of 1,248 funds	out of 1,248 funds	out of 1,113 funds	out of 822 funds

The Morningstar proprietary rating reflects historical risk adjusted performance for the period stated. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages. The top 10% of funds in each category receive 5 stars, 22.5% receive 4 stars, 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

The performance data shown represents past performance, which does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. For current month-end performance data, visit our website at meederfunds.com.

Disclosure

Investors are advised to consider carefully the investment objectives, risks, charges and expenses of the fund before investing. The prospectus contains this and other information about the funds. Contact us to request a free copy of the prospectus. Please read the prospectus carefully before investing.

Investment performance assumes reinvestment of all dividend and capital gain distributions. Returns for less than one year are not annualized. Performance data may reflect the effect of voluntary fee waivers or expense reimbursements that may change or end at any time. Without these waivers, performance would have been lower.

Effective October 31, 2016, the Fund began offering Adviser and Institutional Class shares. Performance attributed to these share classes prior to that date is that of the original Retail Class shares. No adjustment has been made to reflect class-specific distribution or servicing fees.

The gross expense ratio reflects the total fund operating expense ratio gross of any fee waivers or expense reimbursements as set forth in the current prospectus. The net expense ratio is the audited ratio of net expenses to average net assets as set forth in the fund's most recent annual report, which may include the effect of voluntary fee waivers or expense reimbursements.

The **Large Blend Category** represents the Morningstar Category average return for the group shown. The **S&P 500 Index** is an unmanaged index of 500 widely held U.S. stocks. All indexes assume reinvestment of interest and dividends. Indexes do not take into account management fees or expenses associated with a mutual fund. One cannot invest directly in an index.

Key Definitions: **Alpha** measures the fund's performance on a risk adjusted basis against the stated benchmark. A positive alpha indicates that the fund has outperformed its index. **Beta** measures the fund's volatility relative to the stated benchmark. A Beta greater than 1.00 indicates that a fund's historical returns have fluctuated more than the stated benchmark. **Standard Deviation** measures the annualized variation of the fund's performance against its mean over time. A higher standard deviation is an indication of greater volatility. **R²** measures the relationship between the fund's performance and the benchmark. A fund that perfectly matches its benchmark has an R² of 100. **Sharpe Ratio** is a risk adjusted measure of excess return that compares a fund's performance with a risk free return. A higher Sharpe ratio indicates better risk-adjusted performance.
