Over The Last Week
As of June 7, 2019

Quick Take

-  The S&P fell over 6% in May but has staged a rally since then. Relative to large-cap companies, mid- and small-caps have not participated as fully in the rally and this has caused weakness in the trend component of our long-term model.
-  The payrolls report for May missed expectations of 175,000 jobs and created just 75,000. This supports factors in our long-term model that suggest global growth is slowing.
-  Market volatility increased this week and was a factor in why we reduced our exposure to the stock market.

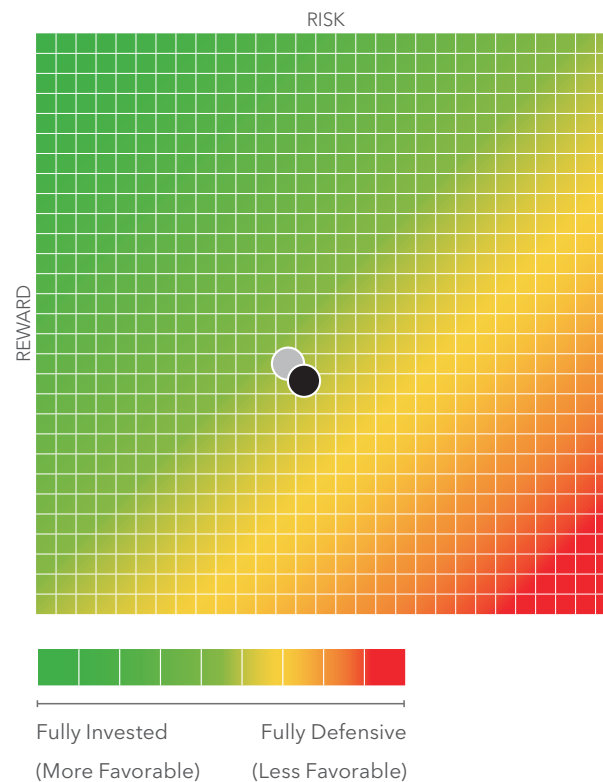

Overall Model Output

A Closer Look at Our Tactical Positioning Targets

Each day, Meeder analyzes and ranks over 70 different factors from our short, intermediate, and long-term models. The dynamic statistical model incorporates factors covering macroeconomic, fundamental, trends and technical analysis to estimate the potential reward and marketplace risk of the equity markets. The Meeder Spectrum, Muirfield, Balanced, Moderate Allocation, and Conservative Allocation funds utilize this strategy for the Defensive Equity portion of their portfolios. The Defensive Equity Strategy guides the allocation of each fund's equity sleeve and the actual proportion of equity investments in any fund will vary depending on the investment objectives of the fund.

Defensive Equity Snapshot

● Current ● Previous Week

Defensive Equity Allocation

Understanding the Defensive Equity Snapshot

The vertical axis of the grid combines the scores of our long-, intermediate-, and short-term models to arrive at the reward value for the stock market. The horizontal axis represents the model's internal measure of stock market risk. The reward value is divided by marketplace risk to arrive at our recommended percentage of Net Equity Exposure.

Meeder Equity Strategy

Equity Allocation

- U.S. Equities 89%
- Developed International Equities 9%
- Emerging Markets Equities 2%

Asset allocation and diversification do not assure a profit or protect against loss. All investments carry a certain amount of risk and there is no guarantee that any strategy will achieve its investment objective. Risks of investment in Meeder Funds include foreign and emerging markets securities risks, derivative and short selling risks, credit and quantitative asset allocation risk.

Meeder Funds are distributed by Adviser Dealer Services, Inc. An affiliated investment adviser, Meeder Asset Management, services as the investment adviser to Meeder Funds.

Meeder Fixed Income Strategy

The Meeder Fixed Income Strategy allocates the fixed income component of our Meeder Dynamic Allocation, Global Allocation, Balanced, Moderate Allocation, Conservative Allocation, and Total Return Bond Fund between U.S. Government and agency securities, investment-grade bonds, high-yield corporate bonds and international debt. Employing a multi-factor model, the strategy covers both asset class and duration of fixed income securities held by the funds.
