Over The Last Week
As of July 26, 2019

Quick Take

- While some U.S. stocks continue to propel the stock market to an all-time high, we are noticing an increasing number of stock prices reaching a 52-week low. Should the trend continue we could see further weakening in market breadth.

+ The number of world markets trading above their long-term moving average increased over the past week signaling more global participation. We view this increase in momentum as a positive sign for U.S. markets.

= The Fed meets Wednesday and investors are widely expecting a 0.25% cut in short-term rates. If this occurs, it would be the first rate cut since 2008. Historically, lower interest rates have been a catalyst for stronger equity returns.

A Closer Look at Our Tactical Positioning Targets

Each day, Meeder analyzes and ranks over 70 different factors from our short, intermediate, and long-term models. The dynamic statistical model incorporates factors covering macroeconomic, fundamental, trends and technical analysis to estimate the potential reward and marketplace risk of the equity markets. The Meeder Spectrum, Muirfield, Balanced, Moderate Allocation, and Conservative Allocation funds utilize this strategy for the Defensive Equity portion of their portfolios. The Defensive Equity Strategy guides the allocation of each fund's equity sleeve and the actual proportion of equity investments in any fund will vary depending on the investment objectives of the fund.

Net Equity Exposure 100%

Understanding the Defensive Equity Snapshot

The vertical axis of the grid combines the scores of our long-, intermediate-, and short-term models to arrive at the reward value for the stock market. The horizontal axis represents the model's internal measure of stock market risk. The reward value is divided by marketplace risk to arrive at our recommended percentage of Net Equity Exposure.

Meeder Funds are distributed by Adviser Dealer Services, Inc. An affiliated investment adviser, Meeder Asset Management, services as the investment adviser to Meeder Funds.

Meeder Fixed Income Strategy

The Meeder Fixed Income Strategy allocates the fixed income component of our Meeder Dynamic Allocation, Global Allocation, Balanced, Moderate Allocation, Conservative Allocation, and Total Return Bond Fund between U.S. Government and agency securities, investment-grade bonds, high-yield corporate bonds and international debt. Employing a multi-factor model, the strategy covers both asset class and duration of fixed income securities held by the funds.
