FORM ADV, Part 2A

November 8, 2019

This brochure provides information about the qualifications and business practices of Meeder Advisory Services, Inc. If you have any questions about the contents of this brochure, please contact us at the telephone number listed above. The information in this brochure has not been approved or verified by the United States Securities and Exchange Commission (“SEC”) or by any state securities authority. Meeder Advisory Services, Inc. is registered with the SEC as an investment adviser; however, registration does not imply any level of skill or training.

Additional information about Meeder Advisory Services, Inc. is also available on the SEC’s website at www.adviserinfo.sec.gov.

ITEM 2 – MATERIAL CHANGES

This brochure is updated annually and whenever any information in the brochure becomes materially inaccurate. Annually the firm provides clients with a copy of the updated brochure or a summary of material changes made to the last annual update. This section describes the changes made to this ADV disclosure brochure since its last annual amendment on March 31, 2019.

- **Item 4.** The Advisory Business section was amended to include a discussion of separately managed accounts and the Private Wealth Management investment advisory service.
- **Items 5, 7, 12, 16 and 17.** The Fees and Compensation, Types of Clients, Brokerage Practices, Investment Discretion and Voting Client Securities sections were amended to include or accommodate the Private Wealth Management program.

ITEM 4 – ADVISORY BUSINESS

Meeder Investment Management, Inc. (“MIM”) offers a complete range of equity, fixed income and cash management investment solutions through its wholly-owned SEC registered investment advisers: Meeder Advisory Services, Inc. (“MAS”), Meeder Asset Management, Inc. (“MAM”), and Meeder Public Funds, Inc. (“MPF”). MIM’s principal owners are Robert Meeder, Jr. and Robert Meeder, Sr. All affiliates of MIM are located at 6125 Memorial Drive, Dublin, Ohio 43017 and share employees.

Meeder Advisory Services, Inc. offers separately managed account, strategist and portfolio management services to third-party financial institutions. MAS also provides retirement plan services to plan sponsors and participants, including plan fiduciary and participant account management services. As of September 30, 2019, MAS’s regulatory assets under management were \$448,540,165, all of which were managed on a discretionary basis.

Private Wealth Management

Acting as a portfolio manager, MAS provides investment management services for separately managed account programs (“SMA programs”) sponsored by independent financial services firms, including banks, broker-dealers, asset management platforms, and other investment advisers (“Program Sponsors”). In all such programs, MAS is selected by the Program Sponsor to provide investment management services for some or all of a client’s invested assets. Program Sponsors help clients select a suitable investment strategy and provide MAS with written information regarding the client’s investment objectives, guidelines or applicable restrictions. SMA program clients typically have limited direct contact with MAS investment professionals

and the Program Sponsor is responsible for periodically contacting the client to ascertain whether any changes have occurred in the client’s financial circumstances or investment objectives. The Program Sponsor provides clients with account monitoring, advice and account services regarding accounts enrolled in the Private Wealth Management program.

Available Programs

MAS offers its Private Wealth Management SMA program in several different forms, each of which shares a common investment management strategy. Where MAS has been selected as an investment manager in a wrap fee program, clients do not pay a fee directly to MAS, which receives a portion of the wrap fee charged by the Program Sponsor for asset management, trade execution, custody and reporting functions. In these programs, MAS assumes investment discretion to buy or sell securities and investments for the account consistent with the strategy selected by the client and any applicable investment guidelines or restrictions.

MAS also offers SMA program services through dual contract arrangements, in which clients execute agreements directly with MAS and pay a separate asset management fee for its investment management services. In these programs, clients enter into a separate agreement with a third-party investment adviser or program sponsor who is responsible for account monitoring, advice and account services. Fees paid to MAS in dual contract arrangements are in addition to those owed by clients to the third-party adviser. In these programs, MAS assumes investment discretion to buy or sell securities and investments for the account consistent with the strategy selected by the client and any applicable investment guidelines or restrictions.

Finally, MAS offers SMA program services through model or strategist programs. In these programs, MAS is retained by the Program Sponsor to provide model portfolios for a given set of objectives. MAS does not exercise investment discretion or directly trade accounts for these programs. The Program Sponsor retains investment discretion and may or may not elect to execute any or all of the transactions recommended for the account. Any fee paid to MAS in a model or strategist program is paid by the Program Sponsor from the platform fees charged to the client.

Investment Management Services

Meeder Private Wealth Management accounts offer personalized investment management tailored to each client's individual goals. Accounts are offered at two service tiers, Select Access and Private Access, depending on the assets under management. All Private Wealth Management accounts are managed to a personalized benchmark selected by the client. Securities are selected for the account consistent with the selected benchmark and strategy. Portfolios are based on a strategy suitable for the client's investment objectives and risk tolerances, but are individually tailored to reflect each client's investment objectives, risk tolerance, and time horizon while seeking to maximize after tax return.

In both Select and Private Access accounts, the individual equity and asset allocation decisions seek to minimize tax liability by undertaking transactions in a tax efficient manner. All Private Wealth Management accounts utilize individual equity securities to maximize the deferral of capital gains and allow for tax loss harvesting. Tax management decisions are based on the cost-basis information provided by the client and will generally be limited to that portion of a client's total portfolio managed by MAS. Use of these techniques may cause portfolio performance to deviate from that of a model portfolio that is not traded for tax management objectives. MAS does not provide tax planning advice or services.

Private Access accounts offer the option to further customize the account and deviate from available benchmarks and strategies. For clients with Private Access accounts, MAS may develop a custom strategy to guide the realization of gains or losses in existing positions. MAS also designs custom portfolios for Private Access accounts around existing large or concentrated positions. Private Access clients may take other steps to customize the realization of gains or losses in the account in order to meet individualized objectives.

Where appropriate, MAS may utilize the services of a sub-adviser in this program. Factors relevant to MAS's selection of sub-advisers include the sub-adviser's performance, methods of analysis, fees, expertise and experience. MAS will periodically monitor the sub-adviser's performance to ensure that its management and investment style remain aligned with the objectives and goals of the portfolio. MAS does not charge a separate fee for utilization of a sub-adviser in a Private Wealth Management account and pays

the sub-adviser directly for its services from the advisory fee paid by the client.

Client Investment Guidelines and Restrictions

In all Private Wealth Management accounts, clients may impose reasonable restrictions on the management of their accounts, including restrictions on particular securities or types of investments. In Private Access accounts, clients may customize the investment strategy with individualized investment guidelines. All account guidelines and restrictions will be reflected in the account agreement, application or other documentation applicable to the account. MAS may decline to accept investment guidelines or restrictions that, in its judgment, would be unduly restrictive or impractical in light of the selected strategy. The imposition of client guidelines or restrictions on any investment strategy will cause the account to differ from other clients utilizing the same strategy.

Strategist Services

Acting as a strategist, MAS provides investment advisory and sub-advisory services to broker-dealers, platforms, and investment advisers ("Financial Intermediaries"). While each model portfolio is designed to achieve a certain investment objective, they are not tailored to meet the needs of any particular client. The Financial Intermediary is responsible for determining whether a particular model portfolio is suitable or appropriate to meet the investment needs of the client. MAS does not enter into investment management agreements with clients who select model portfolios or assume continuous supervision of the accounts. Financial Intermediaries who elect to offer model portfolios are typically responsible for trade execution, reporting, monitoring and client service tasks.

Meeder Investment Portfolios

Meeder Investment Portfolios offer clients the opportunity to purchase a managed portfolio of Meeder Funds designed to meet a variety of investment objectives. MAS offers both risk-based models designed to achieve objectives that balance growth and income with portfolio risk, as well as age-based models designed to match specific investment objectives and risk tolerances with the investor's current age.

The portfolios consist principally or exclusively of Meeder Funds selected by the portfolio manager to meet specific investment objectives and risk tolerance levels. Meeder Funds are often the only investment options utilized for a Meeder Investment Portfolio. In other cases, MAS exercises a preference for its affiliated proprietary mutual funds, but may supplement the portfolio with limited third-party mutual funds to meet specific objectives. Clients select a portfolio that meets their needs.

Multi-Manager Portfolios

Multi-Manager Portfolios are offered under different platforms

and under several different names. Multi-Manager Portfolios consist of a combination of Meeder Funds and non-affiliated mutual or exchange-traded funds selected by MAS from those made available by the Financial Intermediary to meet specific investment objectives and risk tolerance levels. These portfolios are generally designed to diversify assets across a series of different investment management styles and asset classes. In some cases, MAS charges a management overlay fee for its portfolio management services. In addition, MAM, an affiliated investment adviser, receives investment management fees from the Meeder Funds for fund assets included in the portfolios.

Advisory Consulting

Advisory Consulting services are offered to investment advisers on a non-discretionary basis. Services include a comprehensive analysis of existing investment models, analytics and model portfolio recommendations. MAS will assist Advisory Consulting clients with development of suitable investment policy statements and implementation of an investment committee and portfolio review process. Advisory Consulting clients receive periodic reports tracking performance of the model to suitable benchmarks with recommendations for changes or further review.

All Advisory Consulting services are offered on a model portfolio basis. Investment advisory clients of the program retain investment discretion and may or may not elect to execute any or all of the transactions recommended for the model portfolios. Many Advisory Consulting portfolios incorporate an allocation to Meeder Funds and MAS may exercise a preference for Meeder Funds over other comparable funds in a given category. Meeder's affiliates earn investment advisory, administration and transfer agent fees in connection with these funds.

Retirement Plan Services

MAS also provides investment management services to retirement plan sponsors and their participants, including plan level investment management services, managed portfolio solutions, and participant level investment management services.

Plan Level Services

MAS provides retirement plan sponsors with fiduciary investment management services. Acting as an ERISA Section 3(38) investment manager, MAS works with the plan sponsor to develop an investment policy statement detailing the methodology used to select, monitor and replace retirement plan investment options. In accordance with the terms of the retirement plan agreement and investment policy statement, MAS provides plan fiduciary services and exercises discretion to select, review and replace investment alternatives made available to participants in the plan. MAS representatives periodically report to plan sponsors and review the plan's investment options and their suitability under the terms of the investment policy statement and retirement plan agreement.

Meeder Retirement Portfolios

Retirement plan sponsors also engage MAS to offer managed portfolio solutions to their participants. In this program, MAS enters into an agreement with the plan to offer managed portfolios to plan participants as a designated investment option under the plan. Pursuant to the agreement and investment policy statement, MAS exercises discretion in creating and maintaining the portfolios and directs the plan's recordkeeper to implement any changes to the portfolios. Participants select a portfolio that meets their needs from those made available by the plan.

Available portfolios include risk-based portfolios designed to achieve a certain investment objective and risk tolerance, age-based portfolios that match an investment objective and risk tolerance with the participant's current age, and target date portfolios that follow an incremental glidepath in which the asset allocation becomes more conservative over time. Meeder Retirement Portfolios may be constructed from proprietary Meeder Funds, non-affiliated mutual or exchange-traded funds. For portfolios constructed from Meeder Funds, the portfolio manager exercises a strong preference for Meeder Funds, but on some platforms may supplement the portfolio with limited third-party mutual funds to meet specific objectives.

Participant Level Services

Retirement plan sponsors may also designate MAS as a discretionary investment manager for participant accounts. Under this program, plan participants execute an investment advisory agreement with MAS and select from a series of portfolios, which may include Meeder Investment Portfolios containing Meeder Funds or portfolios built from non-affiliated mutual and exchange-traded funds. Plans may offer both risk-based portfolios designed to achieve a certain investment objective and risk tolerance and age-based portfolios that match an investment objective and risk tolerance with the participant's current age. Participants select a portfolio that meets their needs from those made available by the plan.

ITEM 5 – FEES AND COMPENSATION

MAS is generally compensated on the basis of fees calculated as a percentage of client assets under management, although fixed fee and other arrangements are made available to institutional clients. Some fees are negotiable depending on a various factors, including the type and size of account, services offered, and relationship to other accounts. Terms and conditions vary by program and may be found in the client agreements and disclosures for each product, program or service.

Private Wealth Management

Private Wealth Management services are offered under the following standard fee schedule. The schedule is linear and the applicable rate will be charged to all assets under management

at the rate set forth in the schedule. Where billed directly by MAS, fees are typically billed monthly in arrears based on the average daily balance of the account and deducted from the client account by the custodian.

Private Wealth Management		
Assets Under Management	Select Access	Private Access
Under \$1,000,000	0.80%	0.80%
\$1,000,000 - \$2,500,000	0.70%	0.70%
\$2,500,000 - \$5,000,000	0.65%	0.65%
\$5,000,000 - \$7,500,000	0.60%	0.60%
7,500,000 – 10,000,000	0.55%	0.55%
Over \$10,000,000	0.45%	0.45%
Minimum Investment	\$250,000	\$1,000,000

Private Wealth Management clients who select MAS to provide investment management services through a wrap fee or asset management program generally pay a single fee to the Program Sponsor. MAS receives a portion of the fee paid to the Program Sponsor pursuant to an agreement between MAS and the Program Sponsor. Investment management fees for wrap fee and asset management programs are negotiated separately with each Program Sponsor and program terms may vary from program to program. For these programs, the amount, terms and conditions of the fee paid by the client will be set forth in the agreements and disclosure documents provided to the client by the Sponsor Firm.

Strategist Services

Fees billed for strategist, model portfolio and Advisory Consulting services depend on the total assets under advisement, the nature of the investments, and the services contemplated. Agreements are individually negotiable depending on the nature of the services. Advisory fees are not typically charged in connection with Meeder Investment Portfolios or Multi-Manager Portfolios offered by its Financial Intermediary partners. In some cases, MAS receives an annual overlay fee for management of the Multi-Manager Portfolios, which is included in the fees charged to the client by the Financial Intermediary.

Retirement Plan Services

Plan Level Services

The fees charged by MAS for plan level retirement services are typically based on a percentage of assets under management. Fees are negotiable and vary depending on a variety of factors, including the type and size of the plan, the nature of the services being offered and investment options to be included in the plan. The minimum fee for plan level retirement services is \$2,500. Annual management fees vary by plan, but generally range from 0.10% to 0.50% of eligible plan assets.

Meeder Retirement Portfolios

Fees charged by MAS for offering Meeder Retirement Portfolio managed account solutions to plan participants are set forth in an agreement with the plan offering the product and vary depending on a number of factors, including the type and size of the plan, the nature of the services being offered, and the type and number of Meeder Retirement Portfolios being offered. No advisory fee is charged for Meeder Retirement Portfolios containing Meeder Funds. The annual management fee for non-proprietary portfolios ranges from 0.50% to 0.75%.

Participant Level Services

Fees charged for participant level retirement services are set forth in the agreement with the participant and depend on the product selected. MAS waives any investment advisory fee for the sums invested in the Meeder Funds or credits to participants an amount equal to the investment management fee that its affiliate MAM receives as the investment adviser for the Meeder Funds included in the account. Accordingly, the fee charged for investment advisory services varies from 0.00% for Meeder Investment Portfolios to 0.40% for non-proprietary portfolios.

Other Fees and Expenses

Depending on the investment advisory services, investment strategy, underlying securities and selected custodian, clients may pay additional fees or expenses for certain services or transactions. In addition, MAS earns additional compensation in connection with certain investment products or services made available to its clients.

Custodial Fees

Clients utilizing MAS services may pay other account related expenses in addition to any advisory fees payable to MAS, including brokerage commissions, advisory fees, transaction fees, custodial fees, administration fees, transfer taxes, wire transfer fees, and other fees and taxes charged to brokerage or retirement accounts. MAS products and services offered through third-party platforms are subject to other advisory, custodial and service fees charged by the platform. Item 12 of this brochure provides additional information about the adviser's brokerage practices.

Internal Product Expenses

Mutual funds, money market funds and exchange-traded funds charge internal management fees and other expenses. These expenses are typically charged as a percentage of the asset value of the fund and have the effect of reducing the overall performance of the investment. These fees and expenses are fully disclosed in the prospectus for the product and are in addition to the investment management fee charged for the program.

Proprietary Mutual Fund Fees and Expenses

Some portfolios include positions in Meeder Funds. A MAS affiliate is the investment adviser for the Meeder Funds and receives compensation paid by the funds for its investment advisory services. In addition, MAS's affiliates earn administrative, transfer agent and distribution fees for various services provided to the funds. These fees are set forth in the Meeder Funds prospectus and annual report. Meeder Investment Portfolios do not charge an investment advisory fee. For accounts that hold individual positions in Meeder Funds, MAS generally waives any investment advisory fee otherwise due under the investment management agreement for the sums invested in the Meeder Funds, but may charge an overlay fee in some instances for management of non-proprietary funds.

Financial Adviser Fee

The financial adviser fee is paid to unaffiliated broker-dealers and investment advisers who refer clients to MAS and compensates them for consultation and other services provided to clients who select MAS services. Where applicable, the financial adviser is responsible for obtaining information regarding the client's financial situation and investment objectives, making a determination that the recommended investment program is suitable for the client, providing the client with information about the program and its investment adviser, assisting the client with the account paperwork, and being reasonably available to the client for ongoing consultation. Financial advisers receive compensation for these services at a rate approved by the client up to 1.50%. This fee is paid separately from the investment management fees charged by MAS and may increase the total fees paid by the client.

Additional Information about Fees and Expenses

Depending on the program, investment advisory fees may be charged monthly or quarterly in arrears. The terms and conditions for each product and plan vary and may be found in the agreements and disclosures for that product. For most MAS products, fees payable to MAS are deducted from the portfolio by the financial intermediary, custodian or plan trustee. Clients who opened accounts under pre-existing fee schedules will continue to be billed at the rates set forth in the account documentation unless notified otherwise. Fee and billing arrangements for legacy accounts may therefore vary from the program's current fee schedule and billing terms.

For participant level services, the amount, terms and conditions of the investment advisory fee, including any applicable solicitor, administration or servicing fee, is set forth in the plan participant or investment advisory agreement.

ITEM 6 – PERFORMANCE-BASED FEES AND SIDE-BY-SIDE MANAGEMENT

MAS does not charge performance-based fees.

ITEM 7 – TYPES OF CLIENTS

MAS offers investment advisory services to financial intermediaries, investment advisers, retirement plans and retirement participants. Strategist services are offered exclusively to broker-dealers, platforms, investment advisers and other financial intermediaries who wish to offer the models to their clients. MAS offers Retirement Plan Services to plan sponsors and their participants. Terms and conditions of MAS services, including minimum account size, vary among individual programs and are set forth in the agreements or other documents describing the product or service.

ITEM 8 – METHODS OF ANALYSIS, INVESTMENT STRATEGIES AND RISK OF LOSS

Methods of Analysis and Investment Strategies

Through its investment advisory affiliates, Meeder offers a broad array of equity, fixed income and other investment strategies designed to meet the needs of individual investors and retirement participants. Meeder offers its strategies to clients in a variety of forms, including the Meeder Funds, portfolios, separately managed accounts, and individually managed accounts. Depending on the product or service selected, Meeder will allocate assets across a wide variety of securities and other investments, including Meeder mutual funds, unaffiliated mutual funds, ETFs, closed-end funds, fixed income securities, individual equities and alternative investments.

Meeder specializes in quantitative investment analysis. This is a method of evaluating securities and other assets by analyzing large amounts of data through the use of quantitative models. Our investment models consider a wide breadth of factors – from traditional valuation and profitability measures, to momentum indicators, to other price signals. This data universe, combined with our proprietary signal construction methodology and optimization process, is used to create the proprietary models that guide our investment process. Meeder performs ongoing research to continually maintain and improve the effectiveness of its quantitative investment models and analysis.

Some strategies are customized to meet the individual needs of our financial partners and may only be available to certain platforms or plans. MAS designs and implements an asset allocation strategy for each of the portfolios and allocates assets across funds available on each platform under the terms of each product or service. Each portfolio has its own objective and risk characteristics. Some portfolios include an allocation to alternative asset classes, such as derivatives, commodities or other alternative investments. MAS utilizes these methods of analysis and investment strategies to develop and manage the Meeder Investment Portfolios, Multi-Manager Portfolios and Meeder Retirement Portfolios.

Risks Associated with Portfolio Investments

Investing in securities involves risk of loss that clients should be prepared to bear. Although MAS manages client assets in a manner consistent with the stated investment objective and risk tolerance of the portfolio product, the investment decisions we make may not produce the expected returns, may cause the portfolio to lose value, or may cause the portfolio to underperform other portfolios with similar investment objectives. There is no assurance that a portfolio's objective will be achieved. Material risks associated with investing in the portfolios include:

Asset Allocation Risk. The portfolios rely heavily upon allocation of assets among different asset classes to achieve their investment objectives through diversification. If asset classes perform differently than expected, the portfolio may perform worse than a non-diversified portfolio.

Commodities Risk. The strategies may cause us to invest in underlying funds that invest in commodities. Investments in commodities are subject to greater volatility than traditional securities. Commodity prices are influenced by unique factors distinct from those that affect stocks and bonds, including supply and demand factors, weather, currency movement, and international government policy.

Concentration Risk. Some portfolios are concentrated in Meeder Funds, which are managed by the same investment adviser. A strategy followed by the adviser could adversely affect all or most of the funds in the portfolio, causing it to perform worse than a portfolio diversified over multiple managers.

Credit Risk. A decline in the credit quality of a fixed income investment held by an underlying fund that invests in bonds or corporate debt obligations could cause the fund to lose value. An issuer of a fixed income security may not be able to make interest and principal payments when due. Such default could result in additional losses.

Derivatives Risk. The portfolios may include underlying funds that utilize derivatives in connection with their investment strategies, including futures and options. Derivatives are riskier than other types of investments because they may be more sensitive to changes in economic or market conditions and could result in losses that significantly exceed the original investment. Derivatives also are subject to the risk that changes in the value of a derivative may not correlate perfectly with the underlying asset, rate or index.

Exchange Traded Funds Risk. Many of the portfolios are comprised of ETFs, which may not be able to exactly replicate the performance of the indices they track. An ETF may also trade at a discount to its net asset value.

Fixed Income Risk. The portfolios may include underlying funds that invest in fixed income securities. These securities will increase or decrease in value based on changes in interest rates. If interest rates rise, the value of a portfolio's fixed income

investments generally declines.

Foreign Investment Risk. Investments in underlying funds that hold securities of foreign issuers present additional components of risk; including economic, political, legal, and regulatory differences compared to domestic investments. Foreign currency fluctuations may also affect the value of foreign investments.

Investment Company Risk. Most portfolios are comprised of mutual funds and the value of the portfolio will fluctuate in response to the performance of the underlying fund. Mutual funds also generate taxable capital gains distributions to a greater extent than would be the case for a direct investment in equities held by the fund.

Leverage Risk. The portfolios may include funds that make use of leverage, such as borrowing money to purchase securities or the use of derivatives, which may result in additional expenses and magnify the gains or losses.

Market Capitalization Risk. A portion of the portfolios may be allocated to mid and small capitalization investments. Investments in these capitalization ranges may be more sensitive to events and market conditions than large capitalization stocks.

Market Risk. The portfolios hold equity investments, which fluctuate in value due to changes in general economic conditions and market developments.

Quantitative Analysis Risk. The adviser relies heavily on quantitative data supplied by third parties to evaluate investments and construct optimal portfolios. In the event this data is inaccurate or incomplete, investment decisions may be compromised. Quantitative analysis is unlikely to be successful unless the quantitative assumptions made by the adviser remain relevant in future market conditions. If future market environments do not reflect the assumptions made in our quantitative models, quantitative investment strategies employed may exhibit capital loss.

Real Estate Risk. The portfolios may invest in underlying funds that invest in real estate, including real estate investment trusts. The value of these securities will rise and fall in response to many factors, including economic conditions, the demand for rental property and changes in interest rates.

Short-Selling Risk. Our strategies may cause us to invest a limited portion of a portfolio in funds that engage in short-selling of securities. The fund will incur a loss as a result of a short sale if the price of the security sold short increases in value between the date of the short sale and the date on which the fund purchases the security to replace the borrowed security. Fund losses are potentially unlimited in a short sale transaction, which are considered speculative in nature.

Turnover Risk. An underlying fund may actively trade portfolio securities to achieve a principal investment strategy, which can be driven by changes in quantitative investment models. A high

rate of portfolio turnover involves correspondingly high transaction costs, which may adversely affect account performance over time and may generate more taxable short-term gains for shareholders or clients.

ITEM 9 – DISCIPLINARY INFORMATION

We are required to disclose all material facts regarding any legal or disciplinary events that would be material to your evaluation of us or the integrity of our management. MAS has no reportable disclosures.

ITEM 10 – OTHER FINANCIAL INDUSTRY ACTIVITIES AND AFFILIATIONS

MAS is a wholly owned subsidiary of MIM. Other wholly owned subsidiaries of MIM include MAM, MPF, Adviser Dealer Services, Inc. (“ADS”), Mutual Funds Service Company (“MFSCo”) and Meeder Insurance Services, LLC.

MAM is a registered investment adviser that serves as the investment adviser for the Meeder Funds. In addition, MAM provides investment advisory services to individuals, corporations, institutional entities, retirement plans and their participants.

MPF is a registered investment adviser that provides professional investment advisory and administrative services to state and local public funds managers. MPF provides both discretionary and non-discretionary investment management services limited to the purchase and sale of fixed income securities.

ADS is a limited purpose broker-dealer and FINRA member firm which serves as the principal underwriter and distributor of the Meeder Funds. ADS does not hold client accounts or execute trades for MIM affiliates.

MFSCo provides shareholder, transfer agent and dividend distribution services for the Meeder Funds. Acting as the administrator for Meeder Funds, MFSCo enters into selling and service agreements with unaffiliated broker-dealers and financial intermediaries to distribute and provide other services in connection with the sale of fund shares.

Meeder Insurance Services, LLC., is a licensed insurance agency. Some Meeder representatives are licensed insurance agents or representatives of Meeder Insurance Services who may recommend the purchase of certain insurance products. Insurance products are offered on a commission basis.

ITEM 11 – CODE OF ETHICS, PARTICIPATION OR INTEREST IN CLIENT TRANSACTIONS AND PERSONAL TRADING

Code of Ethics

MAS has adopted a Code of Ethics that complies with Rule 17j-1 of the Investment Company Act of 1940 and Rule 204A-1 of the Investment Advisers Act of 1940. The Code sets forth fiduciary

standards that govern the conduct of directors, officers and employees who have access to client information. The Code incorporates the firm’s outside employment, political contribution, and gift policies. Personnel subject to the Code must acknowledge their compliance with the Code and applicable securities laws and report any violations of the Code with which they become aware to the firm’s Chief Compliance Officer. A copy of the Code is available to prospective and current clients upon request.

Directors, officers and employees of MAS and its affiliates may take positions in securities owned by the firm’s clients, which may pose a potential conflict of interest. The firm has implemented policies designed to detect and mitigate such conflicts of interest, including prohibitions on unacceptable trading activities, such as front running, short-swing trading and insider trading. Directors, officers and employees who recommend securities or have access to non-public information are prohibited from personally trading in reportable securities recommended to clients in close proximity to the client’s transaction. Employees having access to this information must also make periodic reports of their securities accounts and transactions in reportable securities.

Participation or Interest in Client Transactions

Among its available investment options, MAS offers portfolios allocated principally or exclusively among Meeder mutual funds selected by MAS to meet specific investment objectives and risk tolerance levels. Meeder Funds are often the only investment options utilized for these portfolios. In other cases, MAS exercises a preference for its affiliated proprietary mutual funds, but may supplement the portfolio with third-party mutual funds to meet specific objectives. Because MAS and its affiliates earn fees when proprietary mutual funds are selected for these portfolios, this presents a conflict of interest. The mutual fund fees differ between the available Meeder funds and the total fees collected by MAM and its affiliates will vary depending on the fund allocation in each portfolio.

MAS acts to mitigate this conflict by not exercising discretion over whether or to what extent a client’s assets will be invested in a proprietary portfolio solution. MAS also waives any investment management fee for the sums invested in the Meeder Funds. When allocating portfolios among Meeder Funds, MAS applies fund selection criteria that do not differentiate between or among Meeder Funds and portfolio managers responsible for these strategies are not compensated based on the amount earned by Meeder in management fees for the portfolio.

ITEM 12 – BROKERAGE PRACTICES

When retained on a discretionary basis, MAS may be authorized to determine and direct execution of client portfolio transactions through brokers, dealers and other trading intermediaries. If transaction charges are not included in a wrap fee or other all-inclusive relationship, clients will pay the transaction charges

associated with the execution of trades in their accounts. When selecting broker-dealers to undertake trading on a client's behalf, MAS seeks best execution under the circumstances of each trade.

Best Execution Policies

In selecting brokers through which transactions for client accounts will be executed, MAS's primary consideration is the broker's ability to provide best execution of trades. In making a decision about best execution, MAS may consider a number of factors including, but not limited to, trade price and commission, current market conditions, size and timing of the order, depth of the market, per share price, difficulty of execution, financial responsibility and the ability and willingness of the broker to commit capital by taking positions in order to effect executions. The commission rates paid to any broker for execution of transactions will be determined through negotiations with the broker. MAS regularly reevaluates the execution performance of the broker-dealers it selects for placement of client transactions.

Wrap Fee Programs

Where MAS is retained under a wrap fee or other all-inclusive program, commissions and trading expenses are generally included in the fee charged by the Program Sponsor. In some cases, MAS may be required to execute all trades through the program sponsor or custodian. In other cases, MAS may have discretion to select broker-dealers to execute trades for the accounts it manages inside such a program. However, MAS will generally place such trades through the Program Sponsor because the program fee only covers execution costs on trades executed through the Program Sponsor's platform. MAS may select a broker-dealer other than the Sponsor or its affiliates to effect a trade for a program account if it determines that it is in a client's best interest to do so. When MAS directs trades to a broker-dealer other than the Program Sponsor, a practice known as trading away, clients will pay additional transaction costs not otherwise included in the Program Sponsor's asset-based fee.

Trade Aggregation Policy

MAS may elect to aggregate trades executed for a client's account with trades being executed for the same securities in other accounts we manage, including trades for the Meeder Funds. Each client participating in an aggregated transaction receives the same average share price and transaction costs are shared equally and on a pro-rata basis. If the full amount of an aggregated order is not filled, the partially executed order will be allocated on a pro-rata basis based on the size of the original allocation.

Trade Rotation Policy

Where MAS offers portfolio management services on a model basis, notification of changes to the model are made pursuant to the firm's trade rotation policy. Each broker-dealer, platform or investment adviser ("Financial Intermediary") using the model

is included in the rotation along with Meeder discretionary accounts utilizing the same model. When a change is made to a model portfolio, MAS sends notification to each Financial Intermediary or group of similarly managed accounts in the order of their appearance on the rotation schedule. MAS will not wait for confirmation of order receipt or execution before communicating model changes to other Financial Intermediaries. Each Financial Intermediary is then moved up the schedule by one spot for subsequent changes to the model.

Depending on a Financial Intermediary's place on the rotation and the method elected by that Financial Intermediary for communication of portfolio changes, it is possible that trades will be placed by some Financial Intermediary's before or after others. Accounts for Meeder discretionary clients utilizing model portfolios are included in the rotation and it is possible that trades for other Financial Intermediaries will take place before or after trading for Meeder's discretionary clients depending on their placement in the rotation. In these cases, trades may become subject to price movements that result in model portfolio or Meeder discretionary clients receiving prices that are less favorable than prices obtained by others. Because MAS does not control execution of transactions in model portfolio accounts, MAS does not know in what order its Financial Intermediary clients will execute trades and cannot control the market impact of such transactions.

ITEM 13 – REVIEW OF ACCOUNTS

MAS regularly monitors and reviews individually managed client accounts to ensure that each such account is managed consistently with the selected strategy and any investment guidelines or restrictions provided by the client. Reviews are consistently performed by investment personnel assigned to the account and all accounts are reviewed on a regular basis. Separately managed account clients generally receive quarterly reporting, although some clients may receive additional reporting based on the nature of the services provided.

Meeder Investment Portfolios, Multi-Manager Portfolios and Meeder Retirement Portfolios are assigned to a portfolio manager who reviews the portfolio no less than quarterly to ensure that it meets the selected asset allocation and diversification goals for the product. Additional reviews may take place during significant market events or at a Financial Intermediary's request. Recommended changes to funds selected for a portfolio are reviewed by the firm's Investment Committee.

For plan level Retirement Plan Services clients for whom MAS serves as an investment manager, MAS regularly reviews the plan's designated investment alternatives and their respective performance in light of the plan's investment policy. Using suitable performance benchmarks, MAS evaluates funds and investment managers and makes or recommends suitable changes to the investment alternatives made available by the plan. Recommended changes to the plans are reviewed by the firm's

Retirement Investment Committee.

ITEM 14 – CLIENT REFERRALS AND OTHER COMPENSATION

MAS receives referrals of clients through representatives of broker-dealers and investment advisers not affiliated with our firm. Where applicable, the financial adviser is responsible for obtaining information regarding the client's financial situation and investment objectives, making a determination that the recommended investment program is suitable for the client, providing the client with information about the program and its investment adviser, assisting the client with the account paperwork, and being reasonably available to the client for ongoing consultation. Financial advisers receive compensation for these services at a rate approved by the client up to 1.50%. This fee is described in Item 5 of this brochure and may increase the total fees paid by the client.

MAS also pays solicitor fees to unaffiliated third party broker-dealers and investment advisers who refer clients to MAS. Under these arrangements, MAS shares a portion of the advisory fees collected from the client with referring broker-dealers or investment advisers. Any solicitor payment must be approved by the client after being provided with identity of the solicitor, the amount of the compensation, and the nature of the relationship. Solicitor fees are paid solely from the investment advisory fee paid to MAS and do not result in any additional charge to the client.

ITEM 15 – CUSTODY

MAS does not provide custodial services to its clients. Custody services are selected or provided by the Financial Intermediary or retirement plan sponsoring the program that has selected MAS services. Client will receive from the custodian, at least quarterly, an account statement that identifies the assets in the account with the custodian at the end of the period and that lists all transactions in the account for the period. Clients are encouraged to compare the statements received from their custodians with any statements provided by MAS.

ITEM 16 – INVESTMENT DISCRETION

MAS provides both discretionary and non-discretionary investment advisory services. For many SMA program accounts, individually managed participant accounts, and other managed retirement programs, MAS assumes discretion over management of its clients' accounts and has authority to determine the securities to be bought or sold, and the amount and timing of those transactions, without obtaining prior client consent. This discretionary authority allows MAS to determine the right investment approach for each client's investment objectives. Authority is granted under the terms of the applicable investment management agreement governing the account and is subject to each client's established investment guidelines or restrictions.

MAS does not exercise discretion over strategist or model programs in which the intermediary is responsible for execution of securities trades. In non-discretionary programs, MAS makes periodic investment recommendations to clients in the form of models, strategies or asset allocations. In some cases, non-discretionary clients may ask MAS to place orders for the purchase or sale of recommended securities through executing brokers selected by MAS or the client. In other cases, MAS assumes no responsibility for execution and is responsible only for periodically updating the model consistently with the selected strategy.

ITEM 17 – VOTING CLIENT SECURITIES

Depending on the platform, MAS may accept the obligation to vote proxies on behalf of its clients. In discretionary accounts, MAS typically accepts authority to vote proxies for our clients; however, certain clients may retain proxy voting authority. For those clients who give MAS authority to vote proxies on their behalf, MAS has adopted proxy voting policies and procedures designed to ensure that we vote such proxies in a manner consistent with the best interest of our clients.

To assist MAS with voting proxies, MAS has engaged an unbiased, unaffiliated, third-party proxy voting service to provide proxy voting recommendations. Proxies are generally voted in accordance with the recommendations of the third-party proxy voting service, but MAS reserves the right to exercise its own judgment on a case-by-case basis. MAS will not vote proxies for any client in a manner designed to benefit any other client. In the event MAS becomes aware of a material conflict of interest relating to a proxy between MAS and a specific client, MAS will typically deliver the proxy to the client and disclose the nature of the conflict. MAS's proxy voting policy and procedures and a record of all proxy votes cast on behalf of clients are available upon request. MAS also keeps records regarding votes cast regarding client securities. Please contact MAS for further information.

ITEM 18 – FINANCIAL INFORMATION

MAS has no financial commitments that impair its ability to meet contractual and fiduciary commitments to its clients and has not been subject to a bankruptcy proceeding.
