Institutional	SRUIX	58510R655	10/31/2016	Adjusted Net: 1.16%	Net: 1.49%	Gross: 1.24%

Objective

The Fund seeks to provide long-term capital appreciation.

Investment Strategy

The Spectrum Fund pursues its objective by taking long and short positions in the global securities markets. The Fund primarily invests its long positions in common stocks and investment companies which include domestic and foreign mutual funds and exchange traded funds. In most circumstances, the gross exposure of the Fund will exceed 100% of net assets, which will typically be offset by the Fund's short positions. The Fund implements short positions in anticipation that a security will underperform due to deteriorating value. The Fund also incorporates Meeder's Defensive Equity strategy, which varies the Fund's equity exposure based on the risk/reward relationship of the stock market. The Fund is designed to reduce risk by implementing strategies uncorrelated to traditional investments.

Morningstar Retail Class Ratings

As of 03/31/2025

Overall	3 Years	5 Years	10 Years
★★★	★★★	★★★	★★★
51 out of 99 funds	51 out of 99 funds	32 out of 88 funds	25 out of 56 funds

The Morningstar proprietary rating reflects historical risk adjusted performance for the period stated.

For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads and redemption fees), placing more emphasis on downward variations and rewarding consistent performance.

Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.

The top 10% of funds in each category receive 5 stars, 22.5% receive 4 stars, 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star.

DISCLOSURE

The performance data shown represents past performance, which does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted.

Investors are advised to consider carefully the investment objectives, risks, charges and expenses of the fund before investing. The prospectus contains this and other information about the funds. Contact us at the address below to request a free copy of the prospectus. Please read the prospectus carefully before investing.

Investment performance assumes reinvestment of all dividend and capital gain distributions. Returns for less than one year are not annualized. Performance data may reflect the effect of voluntary fee waivers or expense reimbursements that may change or end at any time. Institutional and Adviser Class share performance reflects Retail Class performance prior to the creation of those share classes.

The Gross Expense Ratio reflects the total fund operating expense ratio gross of any fee waivers or expense reimbursements as set forth in the current prospectus. The Net Expense Ratio is the audited ratio of net expenses to average net assets as set forth in the fund's most recent annual report, which may include the effect of voluntary fee waivers or expense reimbursements. The Adjusted Net Expense Ratio reflects the Net Expense Ratio excluding Dividends on Short Sales and Interest Expense as reported in the Fund's prospectus.

The Morningstar Moderate Target Risk Index tracks a diversified portfolio of global equities, bonds and inflation-hedged instruments with a 60% allocation to equities. Indexes do not take into account management fees or expenses associated with a mutual fund. The Long/Short Equity Category represents the Morningstar Category average return for the group shown.

Key Definitions: Alpha measures the fund's performance on a risk adjusted basis against the stated benchmark. A positive alpha indicates that the fund has outperformed its index. Beta measures the fund's volatility relative to the stated benchmark. A Beta greater than 1.00 indicates that a fund's historical returns have fluctuated more than the stated benchmark. Standard Deviation measures the annualized variation of the fund's performance against its mean over time. A higher standard deviation is an indication of greater volatility. R² measures the relationship between the fund's performance and the benchmark. A fund that perfectly matches its benchmark has an R² of 100. Sharpe Ratio is a risk adjusted measure of excess return that compares a fund's performance with a risk free return. A higher Sharpe ratio indicates better risk-adjusted performance.
