OVERALL MODEL OUTPUT

A Closer Look at Our Tactical Positioning Targets

Each day, Meeder analyzes and ranks over 70 different factors from our short, intermediate, and long-term models. The dynamic statistical model incorporates factors covering macroeconomic, fundamental, trends and technical analysis to estimate the potential reward and marketplace risk of the equity markets. The Meeder Spectrum, Muirfield, Balanced, Moderate Allocation, and Conservative Allocation funds utilize this strategy for the Defensive Equity portion of their portfolios. The Defensive Equity Strategy guides the allocation of each fund's equity sleeve and the actual proportion of equity investments in any fund will vary depending on the investment objectives of the fund.
