OVER THE LAST WEEK
AS OF AUGUST 23, 2024

QUICK TAKE

The long-term model has improved driven by a significant improvement in market breadth at the industry level and strong 6-12 month momentum within the equity markets.

The RISK component of our model continues to remain favorable towards equities as the VIX is at below average levels and the MOVE index trended lower for the third consecutive week.

The intermediate-term model has moved closer to its average as bullish options activity and investor surveys are negatively affecting the model from a contrarian perspective.

A Closer Look at Our Tactical Positioning Targets

Each day, Meeder analyzes and ranks over 70 different factors from our short, intermediate, and long-term models. The dynamic statistical model incorporates factors covering macroeconomic, fundamental, trends and technical analysis to estimate the potential reward and marketplace risk of the equity markets. The Meeder Spectrum, Muirfield, Balanced, Moderate Allocation, and Conservative Allocation funds utilize this strategy for the Defensive Equity portion of their portfolios. The Defensive Equity Strategy guides the allocation of each fund's equity sleeve and the actual proportion of equity investments in any fund will vary depending on the investment objectives of the fund.

DEFENSIVE EQUITY SNAPSHOT

Fully Invested (More Favorable) Fully Defensive (Less Favorable)

DEFENSIVE EQUITY ALLOCATION

UNDERSTANDING THE DEFENSIVE EQUITY SNAPSHOT

The vertical axis of the grid combines the scores of our long-, intermediate-, and short-term models to arrive at the reward value for the stock market. The horizontal axis represents the model's internal measure of stock market risk. The reward value is divided by marketplace risk to arrive at our recommended percentage of Net Equity Exposure.

All investments carry a certain amount of risk and there is no guarantee that any strategy will achieve its investment objective. Risks of investment in Meeder Funds include foreign and emerging markets securities risks, derivative and short selling risks, credit and quantitative asset allocation risk.

Meeder Funds are distributed by Meeder Distribution Services, Inc. An affiliated investment adviser, Meeder Asset Management, services as the investment adviser to Meeder Funds.

MEEDER FIXED INCOME STRATEGY

Quick Take

- » We remain overweight high yield relative to investment grade. After a short period of widening spreads, the sector has rallied over the past couple weeks.
- » We are overweight emerging market debt due to a weakening dollar and momentum in the sector.
- » We have reduced the duration of our portfolios to a neutral stance versus the Bloomberg Aggregate Index after the recent declines in yields.

Fixed Income Preferences

Average Duration

The Meeder Fixed Income strategy allocates the fixed income component of our Meeder Dynamic Allocation, Global Allocation, Balanced, Moderate Allocation, and Conservative Allocation Fund between investment-grade bonds, high-yield corporate bonds and international debt. Employing a multi-factor model, the strategy covers both asset class and duration of fixed income securities held by the funds.
